

Grades: PreK - 12th
Administration: Individual

Educational Assessment of School Youth for Occupational Therapists

Features and Benefits

Developed by occupational therapists, the EASY-OT is an assessment tool that lives up to its name. Quickly evaluate students, write in-depth reports, and take charge of your occupational therapy caseload. The EASY-OT consists of four different developmental assessment forms made for students from preschool through high school, as well as those who are severe and profound, autistic, physically disabled and low-functioning. Each version looks at the areas of fine-motor, gross-motor, visual perceptual, visual-motor and self-help skills. All the Assessment Forms (except for the Low-Functioning form) contain a chart for recording observations of the students being tested.

The four EASY-OT assessment forms include tables to record results from the most commonly-used standardized tests, plus one blank table that can be customized for any other test. Along with the Assessment forms, 18 Templates are provided to assist the administrator in evaluating the student's pre-printing, writing, coloring, cutting and visual perceptual skills.

Four Developmental Assessment Forms of the EASY-OT include:

- **Pre-Kindergarten through Second Grade** includes items relating to cutting skills (*from snipping to cutting complex shapes*), pre-printing skills (*from connecting dots to copying shapes*) and printing skills.
- **Third Grade through Eighth Grade** includes fewer cutting items, but has additional items relating to cursive writing.
- **Ninth Grade through Twelfth Grade** includes items relating to writing accommodations, but does not include items relating to the mechanics of writing (*letter formation, spacing, etc.*).
- **Low-Functioning** (*for students with developmental or physical disabilities*) contains items relating to head and trunk control, range of motion and computer skills.

Unlimited-Use CD:

The EASY-OT can be completed manually in the traditional pencil-and-paper method, or by using the Unlimited-Use CD. The Unlimited-Use CD software also provides the ability to print all of the forms, addendums, and templates for pencil-and-paper administration.

Additional Assessment Aids & Options:

- **Screening Form:** a timesaving checklist used to determine the need for a complete EASY-OT assessment.
- **Annual Report Form:** a systematic way to document student progress, track continued eligibility for services, and organize considerations for the next IEP.
- **Sensory Processing Skills Addendum:** a checklist completed by a parent/therapist evaluating the impact of sensory processing skills on school performance.
- **Life Skills Addendum:** a vocational observation form and life skills checklist that offers a more complete picture of student functioning.

The EASY-OT Complete Kit Includes:

- Unlimited-Use CD (PC Required)
- Examiner's Manual
- Test Templates (Set of 18)
- Assessment Forms (1 of each level)
- Screening Form
